

Greg Ceccarelli

EVP & General Manager of Flow

Greg Ceccarelli is the EVP & General Manager of Flow at Pluralsight, Inc., the leading technology workforce development company that helps companies and people around the world transform with technology. In his role, Greg oversees Pluralsight's Flow product line, which enables software teams to develop engineering intelligence and get unmatched visibility into workflows in order to accelerate product development.

Greg is known as an analytical and empathetic leader who's passionate about improving the developer experience. He brings more than a decade of technology, strategic and operational leadership expertise to Pluralsight from some of the top Silicon Valley technology companies, such as IBM, Google and Dropbox. Most recently, Greg was the Director of Data Science at GitHub, the largest and most advanced development platform in the world, where he was responsible for the company's machine learning pipeline and spearheaded the creation of developer community products, including the Annual State of the Octoverse Studies and The Good Day Project.

With a background in data science, analytics and machine learning applied across various industries, Greg brings a unique perspective on how to best leverage data to serve and enable the needs of product and engineering organizations.

Greg holds a master's degree from the University of California, Berkeley and a bachelor's degree in economics from The American University.
